Subject: Pilgrim nuclear: Request to suspend 2006 MCZM Consistency Certification

---

All,

We would like to keep you updated on our efforts regarding Entergy's Pilgrim station. As you know we are engaged in litigating contentions in front of the NRC's licensing board regarding environmental issues. A licensing decision is expected by May 29, 2012.

We also are asking that Mass. CZM exercise its legal authority under state law and suspend its 2006 federal consistency certification because new information shows that relicensing Pilgrim will not be consistent with state CZM policies. This is outlined in the attached letter, which we have sent to MCZM today.

We hope to hear back from you soon as to the meeting we requested.

Best regards,

Meg Sheehan for JRWA and Pilgrim Watch
